CORE COMPETENCIES

Frontend Development: Component-based architecture, responsive layouts, clean code principles

Problem Solving: Algorithmic reasoning, debugging, performance optimization

Design Thinking: User-centered design, rapid prototyping, iterative UX

Collaboration: Team communication, Git workflows, clear documentation

EDUCATION

Swaminarayan University

2025 – 2029

BE in CE Kalol, Gandhinagar, Gujarat

SGPA: 8.52

Ganpat Rai Salarpuria Saraswati Vidya Mandir

2018 – 2022

Bhagalpur, Bihar

Percentage: 82.6% — State-Level Champion, Maths Experiment

CERTIFICATIONS

Participation Certificate

(link unavailable)

- Participation in a recognized tech competition/event

PROJECTS

Bata Clone

 Code

 Live Demo

 Video

- Rebuilt the Bata e-commerce landing page, replicating a modern footwear shopping platform layout end-to-end.
- Implemented a responsive product listing grid and navigation bar using pure HTML5 and CSS3.
- Focused on precise layout structuring and visual hierarchy across screen sizes.
- Deployed live on Vercel with an accompanying video walkthrough.

FTX Clone

 Code

 Live Demo

 Video

- Recreated the FTX cryptocurrency exchange landing page as a static site, focused on markup and styling fidelity.
- Built modern UI sections including a hero banner, feature highlights, and multi-breakpoint responsive layout.
- Delivered the entire interface without JavaScript, using structured HTML5 and CSS3.
- Deployed to Vercel with a recorded video walkthrough of the design.

Tether (USDT) Clone

 Code

 Live Demo

 Video

- Cloned the Tether (USDT) cryptocurrency website, replicating financial product and informational page sections.
- Structured content-heavy layouts with clean typography for a fintech-grade visual presentation.
- Built entirely with semantic HTML5 and CSS3, prioritizing readability and consistent spacing.
- Deployed on Vercel and documented with a video walkthrough of the finished site.
